

Innovation for immersion-tubes

ETFE^{nova} – especially for immersion-tubes

The material for this Fluoropolymer-coating, which will be applied with a specific method, is highly resistant against chemicals and acids, and has extraordinarily advantages, compared with common coating and lining systems:

- Seamless lining
- No welded joints
- No glue
- Excellent bonding to the substrate
- Variable layer thickness up to 2 mm

ETFE^{nova} Exceptional, universal chemical resistance at high temperatures

ETFE^{nova} Outstanding features in permeation by using filler

ETFE^{nova} Also available in electrical conductive version

ETFE^{nova} Locally repairable

ETFE^{nova} Solvent-resistant

ETFE^{nova} Easy to clean, excellent non-stick properties

ETFE^{nova} Non flammable

ETFE^{nova} Cold-resistant

ETFE^{nova} Best permeation properties

ETFE^{nova} Suitable for vacuum

ETFE^{nova} FDA- and EU-compliant, in line with build up of ETFE ultra⁺
