

A PRODUCT OF OUR LINE ULTRA⁺

Chemical protection at highest level,
with very best permeation properties

ETFE ultra⁺

The material for this Fluoropolymer-coating, which will be applied with a specific method, is highly resistant against chemicals and acids, and has extraordinarily advantages, compared to common coating and lining systems:

- Seamless lining for almost all designs
- No welded joints
- Excellent bonding to substrate
- Compared with usual ETFE outstanding features in permeation by using filler.
- Layer thickness from ~200 µm up to 2 mm
- Comparable in many ways to our PFA ultra⁺ – however the more economically favourable solution.

ETFE ultra⁺

Exceptional, universal chemical resistance at high temperatures

ETFE ultra⁺

Excellent when proven under clean room conditions

ETFE ultra⁺

Also available in the electrical conductive version

ETFE ultra⁺

Locally repairable

ETFE ultra⁺

Solvent-resistant

ETFE ultra⁺

Easy to clean, excellent non-stick properties

ETFE ultra⁺

Low flammable

ETFE ultra⁺

Cold resistant

ETFE ultra⁺

Best permeation properties

ETFE ultra⁺

Suitable for vacuum

ETFE ultra⁺

FDA-compliant
