

## Innovation for immersion-tubes

# ETFE<sup>nova</sup> – especially for immersion-tubes

The material for this Fluoropolymer-coating, which will be applied with a specific method, is highly resistant against chemicals and acids, and has extraordinarily advantages, compared with common coating and lining systems:

- Seamless lining
- No welded joints
- No glue
- Excellent bonding to the substrate
- Variable layer thickness up to 2 mm

- ETFE<sup>nova</sup>** Exceptional, universal chemical resistance at high temperatures
- ETFE<sup>nova</sup>** Outstanding features in permeation by using filler
- ETFE<sup>nova</sup>** Also available in electrical conductive version
- ETFE<sup>nova</sup>** Locally repairable
- ETFE<sup>nova</sup>** Solvent-resistant
- ETFE<sup>nova</sup>** Easy to clean, excellent non-stick properties
- ETFE<sup>nova</sup>** Low flammable
- ETFE<sup>nova</sup>** Cold-resistant
- ETFE<sup>nova</sup>** Best permeation properties
- ETFE<sup>nova</sup>** Suitable for vacuum
- ETFE<sup>nova</sup>** FDA-compliant, in line with build up of ETFE ultra\*
